<u>**Job Description**</u>**: Junior UI/UX Designer**

We're seeking a highly skilled and experienced UI/UX Designer to join our dynamic team. In this role, you will have the opportunity to work directly with our international clients, bringing your creative vision to life and significantly impacting user experiences. This is a chance to leave your mark on various exciting projects, ranging from innovative startups to established industry leaders. You will be working alongside other engineers and developers working on different layers of the infrastructure. Therefore, a commitment to collaborative problem-solving, sophisticated design, and the creation of quality products is essential.

Responsibilities

- Collaborate with product managers, developers, and other stakeholders to define user requirements and design objectives.
- Conduct user research, interviews, and usability testing to gather insights and validate design decisions.
- Create wireframes, prototypes, and user interface designs that effectively communicate design concepts and interactions.
- Iterate on designs based on feedback and user testing results to continuously improve the user experience.
- Ensure consistency and adherence to design standards across all digital platforms and products.
- Stay up-to-date with industry trends, best practices, and emerging technologies in UX/UI design.
- Advocate for user-centered design principles and contribute to a culture of innovation and excellence within the team.
- Work within brand guidelines to create layouts that reinforce a brand's style or voice through its visual touchpoints
- The ideal candidate will have a strong portfolio showcasing their expertise in UX/UI design, as well as a passion for creating exceptional user experiences

Skills

- 0-2 years experience, Bachelor's degree in Interaction Design, or any other design-related field.
- Prior experience with UX/UI design with a strong portfolio to show previous work.
- Excellent knowledge of wireframing tools (Figma, Adobe XD, etc)
- Strong experience with creating wireframes, storyboards, user flow, process flow, and sitemaps.
- Excellent communication and presentation skills.
- Good problem-solving ability with attention to detail.
- Well-read on the new technology and best practices in the market.
