PROFILE

Experienced Flutter developer proficient in crafting high-performance, visually stunning mobile applications with a keen eye for detail and user experience. Expertise in leveraging Flutter's robust framework to deliver cross-platform solutions that seamlessly integrate with backend services and APIs. Skilled in UI/UX design, state management, and optimizing app performance for maximum efficiency. Dedicated to staying abreast of the latest Flutter advancements and best practices, ensuring the delivery of cutting-edge products that meet client requirements and exceed expectations.

Swift Project

Team IHA LLP   **JAN 2023 - till**

Woofily App (IOS App)

- Woofily is a dedicated social networking platform designed specifically for pet owners and animal enthusiasts
- Users can create profiles for their pets, connect with other pet owners, and share experiences, stories, and photos of their furry friends.
- Woofily contains communtiy section; where pet lovers connect, share, and support each other on their journey.
- There is pet host service; where pet host provides a safe, comfortable, and loving environment to your pet.
- In this one can easily be the pet parent and can be pet host.
- Here one can add pet and book any host for the pet.
- You can search host according to the location.
